I'm an advanced student of the Tecnicatura Universitaria en Programación (Programming Degree) at Universidad Tecnológica Nacional in San Rafael Mendoza. This is my last year and I am looking for my first IT job. I have 1 and a half year of academic and non-professional experience working at academic projects and as a free lancer programmer with technologies as React, Redux, Angular, HTML, CSS, Javascript, Express, Node Js, Java, Springboot, MySQL, Mongo DB. Currently working as a free lancer in a web app for an Institute and going to the last year of the programming degree at National Technological University in San Rafael Mendoza.

Experience :

Instituto Superior De Educación Profesional – [Full Stack Developer - October, 2022](#)

- I developed all the web application for the institute to call the attention of the students to make them decide to go there to study for being kinder garden teachers.
- Implemented React to improve the functionality and speed of the application for a better user experience.
- Planned and designed the application based on meetings with the director of the institute to know what she wanted to be the purpose of the app.
- Designed and developed the API with Node Js for a better and fast response of the server.

Tech Stack: React JS, Node JS, Express JS, CSS, Mongo DB, Git

Reciclarg – [Fullstack Developer – November, 2022](#)

- Project made at the university for the hackathon 2022, the intention of this project was to provide people of San Rafael Mendoza with the necessary information to find recycling point in the city.
- Designed and developed the complete API and Database for the app using SOLID architecture to provide a server and improve functionality and have a better way to add updates.

Tech Stack: HBS, Css, Javascript, JQuery, Node JS, Git
